

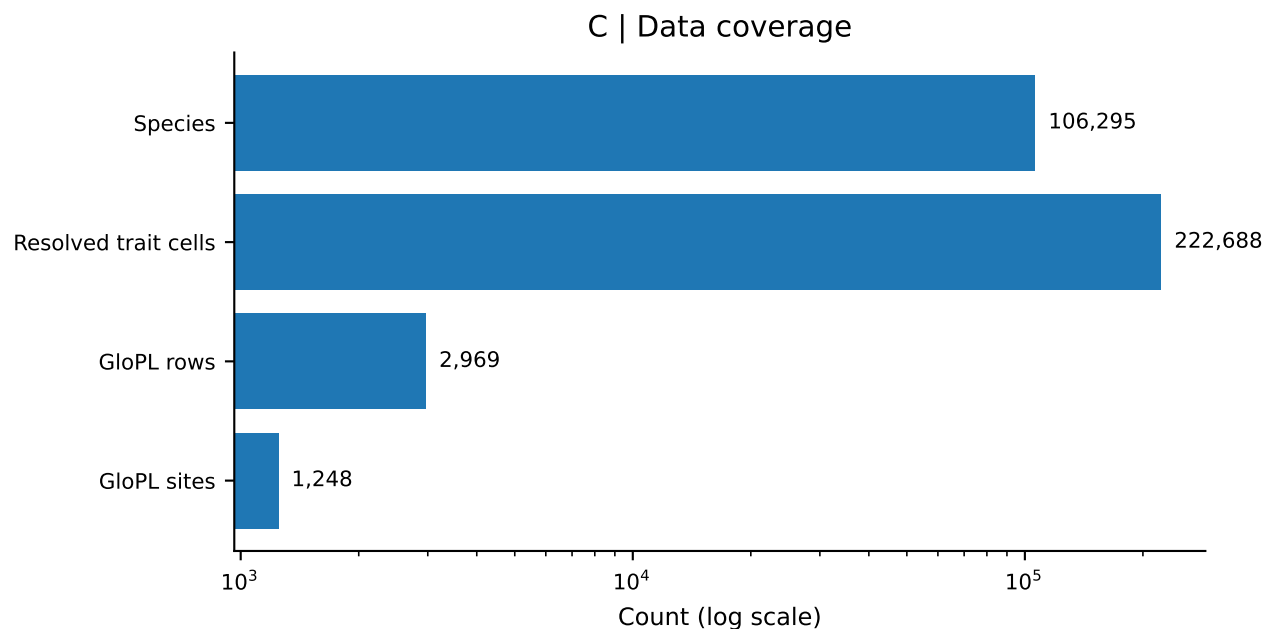

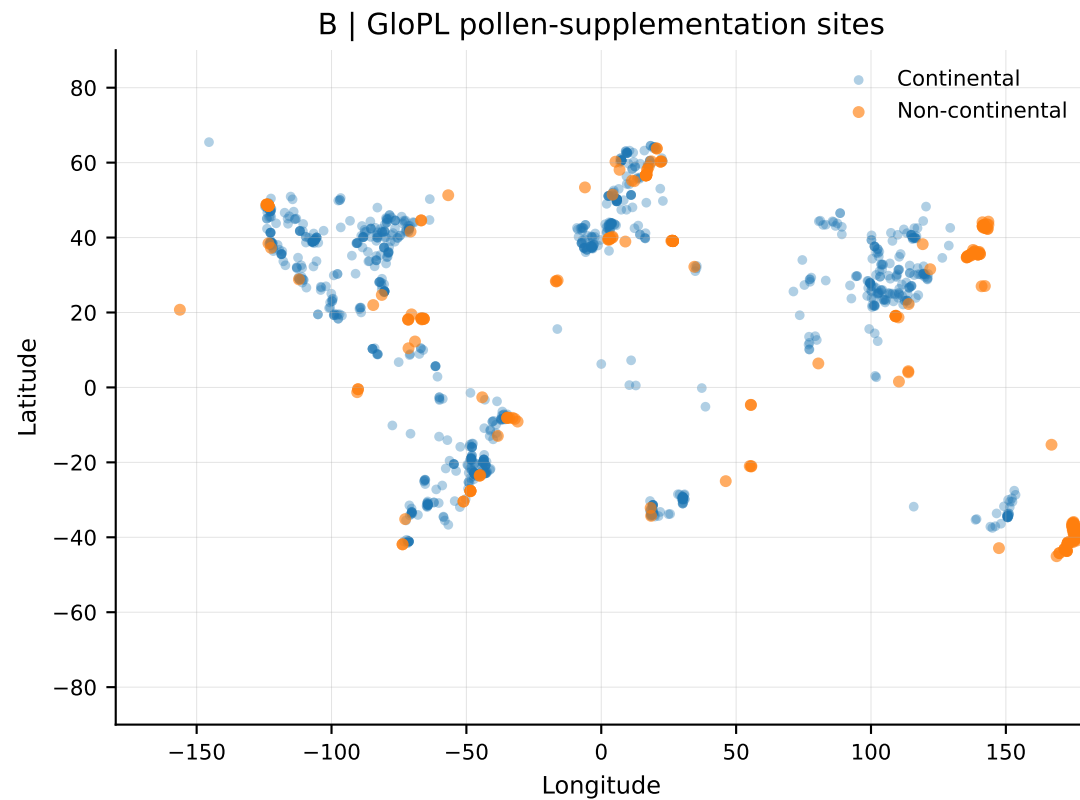

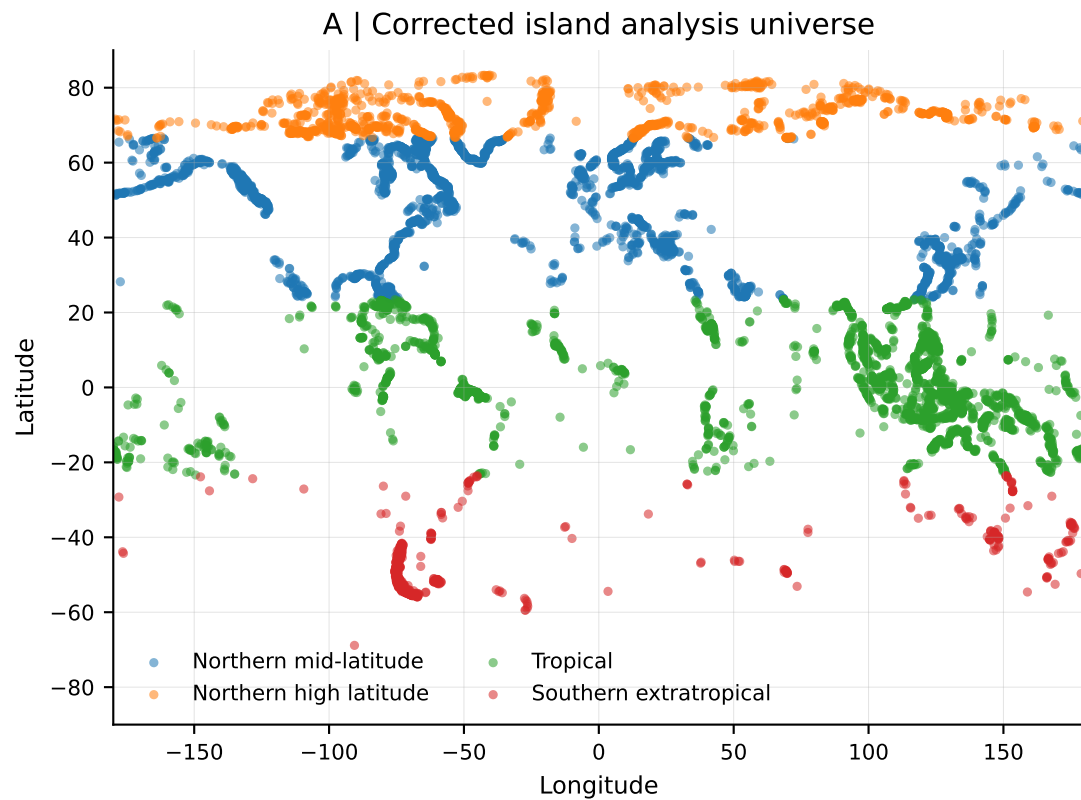

Figure 1 | Global scope and corrected geographic exposure

D | Geography audit

8,264 corrected island units
 4,379 broad H1 islands
 1,113 spurious island zero distances repaired
 median repaired distance = 0.927 km
 1 continental split component excluded
 996 true continental GloPL zeros retained

Exposure: source-matched GSHHG 2.3.7 coastlines
 Metric: minimum minor-great-circle arc separation
